From the colour of its façade, its open distribution to the exterior and the presence of autochthonous vegetation, these villas have been selected to maintain their essence. These villas are sustainable homes, with a bioclimatic architecture and installations to generate low energy consumption. Landscaped roofs, installation of photovoltaic panels, electric car charging point, xerogardening, installation of rainwater collection tanks, aerothermal system for heating and hot water production, are some of the elements that make these homes unique. With a cosy interior in which wood plays a special role, Airen B stands out for having clearly differentiated the rest area from the most active a...
